HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

1. This office action is in response to the 2/11/2008 Board Decision. Claims 1-7 are allowed. The after final amendment filed on 5/13/2003 has been entered and overcomes the objection to the drawings set forth in the office action mailed on 01/13/2003.

Drawings

2. New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because the 03/16/2000 drawings are informal and the drawing changes filed on 5/13/2003 are approved. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Related Application

4. Ahmed US Patent No., 6,774,912, is 09/526,440 which is incorporated by reference at page 1 of the specification describes. (emphasis added with underlining)

Detailed Description Text - DETX (6):

As illustrated in FIG. 2, the YUV pixel path within CRTC1 includes a FIFO 13, a scaler 14 and a color space converter 15 in order to convert the YUV pixel format data into RGB pixel format data for the purposes of the subsequent overlaying or blending and scaling to fit the window if necessary. The overlaying unit, not shown in the FIGS. 1 or 2, may comprise as a minimum a multiplexer, but can also comprise a blending unit which is able to blend two surfaces in accordance with the alpha data of the pixel data. When overlay is desired, the alpha data is set to cause overlay with no blending. The second overlay surface can be a graphic bitmap or other type of surface. Typically, but not exclusively, this is used to display a DVD sub-picture overlay surface over a DVD decoded picture. For example, the secondary display controller's main surface could either be in YUV (4:4:4, 4:2:2, 4:1:1, 4:2:0) or YCbCr (4:4:4, 4:2:2, 4:1:1, 4:2:0) or RGBalpha (8, 16, 24, 32 bpp) format which allows for various types of surfaces to be displayed (grabbed video from video input port, S/W decoded video, graphic images etc.).

Detailed Description Text - DETX (8):

As illustrated in FIG. 3, CRTC1 and/or CRTC2 can be provided with a sub-picture blending unit 15 which is capable of being operated either to provide overlay or blending as illustrated in FIG. 3. The sub-picture blending unit 15 contained within CRTC1 has the ability to overlay one surface over another. In the illustration of FIG. 3 a logo identified as the letter C is either blended or overlaid within a video surface. The blending unit will blend an RGB surface over a YUV surface. Alternatively, the sub-picture blending unit blends, or more typically overlays, the YUV video surface onto the main display buffer to generate the display. One application of this would be adding logos, subtitles etc. In the case of DVDs (as an example) where the language of the subtitles is user selectable, the sub-titles are not embedded in the source of the YUV surface but are overlaid in real-time from a user selectable source.

While the instant claimed invention performs in the claimed method both blend and overlay.

Reasons for Allowance

5. The following is an examiner's statement of reasons for allowance:

At page 8 the Board of Appeals wrote:

The original disclosure remains uncontested as having recited the feature of "blend and/or overlay" which clearly includes both blend and overlay. As argued by Appellant, the change to the current language of "at least one of blend and overlay" removes the alternative language "or" while being within the bounds of the disclosed invention.

At page 10 the Board of Appeals wrote:

Initially we note that, contrary to the Examiner's position, the claim can only require blending or overlaying, not both, and as discussed above with respect to the § 112 rejection, each display controller combines the surfaces by both blending and overlaying.

At page 11 the Board of Appeal wrote:

We do not find convincing the Examiner's line of reasoning that such additional logic necessarily means a second display controller. As argued by Appellant (Br. 13-14), the Examiner's suggestion for additional logic to be a second display controller goes beyond the disclosure of the reference and, rather than any evidence of record, finds its basis only in speculation (FF 4-5).

Thus, the prior art of record fails to teach or suggest in the context of claim 1 first and second display controllers that blend and overlay respective at least two surfaces where both blending of the at least two surfaces and overlaying of the at least two surfaces occur in the claimed method rather than the prior art's blending or overlaying of the at least two surfaces.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jeffery A Brier whose telephone number is (571) 272-7656.
